4WD OF THE SEA

Yamba Welding has been operating since 1974 and building Naiad Design boats since 2010. The boats are built from cut file to lock up.

Naiad Design boat features are:

- Fast craft tactical, patrol, rescue & police vessels
- Aluminium plate construction
- Deep vee performance hull with progressive deadrise
- EVA foam filled collar with heavy duty polyurethane composite outer
- 4 times the strength of hypalon
- Fenders are mechanically attached for easy maintenance
- Utilising new NMSC approved buoyancy foam under floor compartments to give level flotation and full compliance for Survey
- Noted for soft and comfortable riding and capability of maintaining high cruising speeds in rough conditions

Ranging in size from 2.5m to 23m and powered by outboards, diesel jets and stern drives. Naiad vessels are now used by governments around the world for customs surveillance, fisheries protection, police and coast guard duties. Naiad vessels are used as commercial and pleasure vessels for fishing, diving, surveying, pilotage, tourism and as tenders for yachts. The soft ride and predictable handling of Naiads makes them easy to drive in rough conditions, whilst maintaining excellent speed.
