VOLUNTEERS IN THE MARINE
RESCUE ORGANISATIONS**

OC7500

- Length 7.5m
- Beam 2.5m

OC7500 Wide Body

- Length 7.5m
- Beam 3.0m

OC8300

- Length 8.3m
- Beam 3.25m

OC9000

- Length 9.0m
- Beam 3.25m

The Ocean Cylinder® is a unique design offering the speed and performance of a traditional deep vee boat with additional buoyancy and stability

- Aluminium plate construction
- Performance hull
- 3mm aluminium collar filled with buoyancy foam
- Additional buoyancy in hull
- Stable both at rest and at speed
- Utilising new NMSC approved buoyancy foam in cylinders and under floor compartments to give level flotation and full compliance for Survey
- Favoured for operations in areas abounding with permanent and seasonal snags and remote area patrol due to strength of design and durable quality build
- Noted for soft and comfortable riding and capability of maintaining high cruising speeds in rough conditions
- The choice of police, defence, rescue authorities, marine research and commercial operators

Standard Features

- ◆ Sealed self draining floor
- ◆ Transom scuppers
- ◆ Gunwale filler
- ◆ Electric fuel sender
- ◆ Bow sprit & roller
- ◆ Side pockets
- ◆ Split bow rails
- ◆ Side rails
- ◆ Anchor well
- ◆ Bollards - anchor, midship & rear
- ◆ Fendering on cylinders
